SF 330

History

Services have authority, no selection procedures

Brooks-Act 1972, selection based on technical

SF 330

Brooks Act

- Public Announcement
- Firms submit SF 330
- Firms selected on competence and qualifications
- Discussion and ranking of at least three firms

SF 330

Advertising

- Greater than \$25K in FEDBIZOPPS
- Less than \$25K in a public place

SF 330

SF 330 aids in firm evaluation

- Considering documented qualifications and experience
- Enough personnel in required disciplines present
- Proposed team working relationship

SF 330

- SF 254 – general A-E resume good until 08 Jun 2004
- SF 255 – project specific A-E resume good until 08 Jun 2004
- SF 330 – combines and expands SF 254 & 255 mandatory from 08 Jun 2004

SF 330

- Now will look at the parts of the SF 330 and where specific information is found.
- General relevance to A-E most highly qualified firm selection?

24. BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT *(Include scope, size, and cost)*

The nature of the firm's responsibility included architectural design, contract documents and Title II services.

King has received the 2004 COE Honor Award and the Blue Seal Award for the design of this facility.

This project is included to indicate maintenance shop experience and ASRS interface.

An Automated Storage and Retrieval System (ASRS) is attached to this building.

King was responsible for assisting COE and TEAD in locating the ASRS.

Services also included reviewing the storage retrieval system conveyor system and other conveyance systems within the project.

Jackson A. Seeder Management provided review of progress drawings and layout to verify compatibility with the main building.

The facility includes a 333, 000 square foot maintenance area and a 43,000 square foot administrative area.

The automated storage and retrieval system is connected to the maintenance area but is not part of the project.

Maintenance operations include complete overhaul and rebuild of power train components, power generation equipment and engines.

Project size: \$36 million

H. ADDITIONAL INFORMATION

30. PROVIDE ANY ADDITIONAL INFORMATION REQUESTED BY THE AGENCY. ATTACH ADDITIONAL SHEETS AS NEEDED.

SF 330

H	# 30	Area reserved for any Agency specific project requirements.
---	------	---

H. ADDITIONAL INFORMATION

30. PROVIDE ANY ADDITIONAL INFORMATION REQUESTED BY THE AGENCY. ATTACH ADDITIONAL SHEETS AS NEEDED.

A.Metric Experience – King has designed a Caterpillar dealership (schematic and preliminary design) for Cheonan, Korea. The client required that the buildings be designed using metric dimensions and metric materials. The design accommodated metric pre-engineered steel systems as well as insulated wall and roof panels. Data sheets for process equipment included metric specifications. Mechanical Systems were accommodated as much as possible.

B.Computer and CADD Experience – The firm utilizes Autocad, Version 12 to prepare more accurate and better coordinated drawings. This system enhances consultant coordination, speed in production, and quality of contract documents. We are accustomed to working with: ARMS, M-CACES, Integraph Microstation 32 version 4.4.0.23 compatibility, SPECSINTACT.

C.Quality Assurance/Control – All personnel listed will maintain their involvement throughout the project from fee negotiations to move in. All AE team firms are large enough to provide continued professional service coupled with principal and key personnel involvement in all phases of the work. All personnel are very experienced in designing similar projects as can be seen by reviewing the enclosed project lists and resume. Our philosophy of service is to include our clients in the design process before we begin. We have no canned solutions or preconceived ideas about a project. The user and the COE's input will be Quality Assurance and Consultant Coordination.

Quality Assurance is not only checking the documents of all disciplines at the conclusion of the final design phase. It includes: Early organization of the design team, involving the user of the facility throughout the process, involving COE personnel during the design process, conducting early design charettes to receive the benefit and ownership of all personnel involved, establishing and monitoring building performance goals, value engineering, on board reviews, concentrated review periods by personnel not assigned to the project.

D. Cost Control – Our approach to controlling the budget includes estimating utilizing in-house personnel and cost data base and involving professional cost control consultants. All Disciplines participate in early cost identification which establishes each system budget before design begins. Adjustments are made and the estimate is updated to current market conditions. We are experienced with M-CACES and no project we have completed for COE Sacramento has exceeded the Program Amount of our estimate.
